120	tapping shaft		
131	intensity adjustment worm shaft		
141	intermediate gear		
144	drive pipe (ellipse gear)		
156, 157	arm steel globe section	YM103	WEP001Y8957

Examination after inspection and repairing

- Check all operations with the massage block operation test switch.
- Check that the massage block operates using the controller.
- Check that the massage block operates loaded (i.e. sit in the chair and check).
- Upon finishing repairs, when placing the chair, make sure that it has enough space to fully recline. There should be more than 40cm between the wall and the chair when in the upright position.
