

## Under-frame cover

### 1. Removing the under-frame cover.

1. Remove the rear cover beforehand (refer to instructions for removing the rear cover). Set the leg massage.
2. Take off the right and left armrests.
3. Remove the plastic rivet from the reclining lever block. As shown in the photo, remove the rivet (79), and then while pulling, remove (80).
4. Unscrew the two screws (77) of the leg massage lever.
5. Remove the leg massage lever guide (76).
6. Pull out the leg massage lever.
7. Remove the connector of the leg motor (refer to the leg motor section).
8. Unscrew the four screws (47) of the leg frame.
9. Remove the six white plastic C-clips holding the under-frame cover (three along bottom, two (small) along backside, and one immediately under the front of the seat), and then remove the under-frame cover.

#### **\*Caution during installation.**

- When installing the leg massage lever, be careful not to damage the under-frame cover.
